ABSTRACT

For financial freedom, the personal expense has a significant role to play. It's essential that we plan for and manage money at every step of our lives. Without proper planning, we would be living a life of bondage, not knowing how to get off debts and credit as well as sufficiently pay our bills. Living paycheck to paycheck is a highly stressful way of living. While we may have a job that pays for our daily expenses, long medical bills or any other emergency could wreak havoc on us financially.

Hence, The web application "Personal Expense Tracker" is developed to manage daily expenses in a more efficient and manageable way. By using this application we can reduce the manual calculations of the daily expenses and keep track of the expenditure. In this application, user can provide his income to calculate his total expenses per day and these results will be stored for each user. The application has the provision to predict the income and expense for the manager using data mining.
